# DFS SERES PRE-ASSEMBIED cubicir dilive 

## Efficient System Build.

Designing and building a high power drive cubicle takes immense engineering knowhow. Most people don't have that expertise in-house. But we do. And we've put it all into our DFS freestanding drives.

The cubicle system is designed to handlehigh power applications - maximum energy efficiency and ingress protection when you need it most. The drives are pre-assembled, they're easy to set up. Just install the cubicle and flick the switch. Maximum plant availability, minimum technical wizardry required.

## Dissixilf Miy Hitulenis

## Ready to use: Easy set-up

- Industry standard cubicles which integrate with your existing installation (for sizes see page 16)
- Includes power disconnect and fuses
- Pre-installed options available include:
i. EMC filter
ii. Energy monitoring
iii. 24 V back-up supply wiring
iv. Empty sections can be integrated for customer equipment and installation cables
- See page 11 for full list of options
- Water cooling is available on request

## Straightforward set-up \& commissioning

- Commissioning is made easy with a door mounted multi-language HMI
- Enhanced diagnostics thanks to the real time clock
- Connect PC tool for optimum commissioning:
i. Loaded with parameter management features, including cloning
ii. Easy-to-read dynamic logic diagrams so you can visualise and manage the drive in real time

## Fast turnaround

## Need your order ASAP?

Our local Drive Centres and partners have got the quote and order process down to a fine art. Issues that could cause delays are ironed out immediately.

- Emergency breakdowns won't set you back weeks; we'll ship you a replacement drive within a week
- Standard lead-times are six weeks

# HICH POWER APPIICATIONS 

## Fans \& pumps

- Fan \& pump macros, plus onboard logic functions
- Water hammer control, and catch a spinning motor
- On-board Fire Mode
- Improved energy efficiency during low demand

## Compressors

- On board PLC and PID functionalities for advanced control without the cost and footprint of an external controller
- Energy efficiency and optimal control for increased Coefficient of Performance (CoP)

## General Automation

- Maximum control for conveyors with S-ramp acceleration / deceleration profiling and RFC-A automated load control
- Efficient control of mixer applications and up to 200\% overload
- Closed-loop control for cranes and hoists for precision accuracy
- Reliability and control for crushers
- Precision and repeatability for extruder applications
- High energy efficiency and torque control for tunneling and drilling applications and up to 200\% overload

## DFS SERIES MAINTAIN PLANT UPTIME

## With high reliability, easy maintenance and fast service support.

## Rugged, reliable drive systems

- Highly robust cabinets with ingress protection options to meet the needs of the application
i. IP23 as standard
ii. IP54 as selectable option
iii. IP55 water-cooled on request
- Cabinet temperature control via intelligent fan system
- Built with stringent quality controls with full traceability and rigorous testing gives our plant ISO-9001 accreditation
- High quality auxiliary components sourced from leading automation industry vendors

DOWNIDAD

## Diagnostic Tool

Fix error codes quickly and get help with set-up and fault-finding in the Diagnostic Tool app: controltechniques.com/mobile-applications

## Download support

Comprehensive collection of manuals available for download from controltechniques.com or using the QR code.

## Optimum local service support to minimise downtime

- Control Techniques is active in 70 countries and offers global support from local Drive Centers or Partners
- Rapid on-site support, in your language, from highly qualified, experienced service and application engineers
- Efficient service with replacement parts available locally
- Comprehensive online support including: Drive set-up, diagnostic tool and online support

## Drive set-up

Everything you need for quick and easy installation in our free-to-access online guides:
www.drive-setup.com

## Free 2 year warranty

All of our components come with a 2-year warranty so you can rest easy

Warranty terms and conditions apply.

## VARIANTS FOR EVERY APPLICATION

## DFS is available with a control stage to suit any application:

- Industrial automation systems based upon induction or servo motors, where control dynamics are key.
- HVAC/R systems where dedicated drive features provide overall system control.
- DFS supports the latest high-efficiency motors to maximise return on investment and minimise impact on the environment.

## Select from: Unidrive M700, M701, M702 or Pump Drive F600 control

- Onboard real-time multi-protocol Ethernet

Ethernet - $1 \times$ Safe Torque Off (STO) certified to SIL3/PLe

- Analogue and digital I/O

Designed to match Control Techniques' highly popular Unidrive SP feature-set.
replacement - $1 \times$ STO certified to SIL3/PLe

- Analogue and digital I/O

| Safety |  |
| :--- | :--- |
| enhanced | • Onboard real-time multi-protocol Ethernet |
|  | • Digital I/O-If Analogue I/O is required, this can be provided by an SI-I/O option module |
| Process | Optimum energy efficiency for fan, pump and compressor applications. <br> Pump Drive F600 works with permanent magnet or induction motors to deliver the <br> most efficient performance and highest energy savings for fan, pump and compressor <br> applications. |

Please refer to the individual product brochures for full information
Output frequency
DFS drives have a maximum output frequency of 599 Hz and are, therefore, not subject to special export controls.

Door-mounted HMI

AC input disconnect operator

Plinth: 100 mm standard
(200 mm optional)

AC input disconnect operator

Optional cylinder lock with key

Door airfilters

AC input disconnect

Motor connections \& brake terminal

Plinth: $\mathbf{1 0 0} \mathbf{~ m m}$ standard
(200 mm optional)

IP54 roof fan

Drive control terminals

Roof fan supply transformer

Door-mounted HMI

AC input disconnect operator

Optional cylinder lock with key

IP54 roof fan

Fuse holder

## Options:

Feature
Description

A = IP23 (Standard)
$C=$ IP54 - Air inlet grill filters

EMC filter to meet generic emission IEC 61000-6-4 or operate in the First Environment
Remove internal EMC filter for use on un earthed supplies
Remove MOV protection for use on un earthed supplies

A - Main switch with undervoltage release coil 230 VAC (MN)
B - Main switch with undervoltage release coil 24 VAC (MN)
C - Main switch with shunt trip voltage release coil 230 VAC (MX)
D - Main switch with shunt trip voltage release coil 24 VAC (MX)
$2 x$ auxiliary contacts on main switch - supply and wiring

For integration in your control system

Cabinet temperature-controlled roof fan
Plinth 200 mm . Standard plinth is 100 mm
Alternative $180^{\circ}$ door hinges for improved access
Cylinder lock with key for extra cubicle security

A - kWh meter Conventional (IP54) with current transducers (non MID)
B-kWh meter Modbus RTU with current transducers (non MID)
C - kWh meter Profibus (400 V SUPPLYONLY) with current transducers (non MID)
D - kWh meter Ethernet with current transducers (non MID) kWh meter pulse contacts in combination with $A, B, C O R D k W h$ meters

Supply wiring installed for external 24V backup power supply

A - Integrated 400 mm empty cubicle with plinth, cable plates INCLUDING mounting plate for your system equipment
B - Integrated 400 mm empty cubicle with plinth, cable plates and WITHOUT mounting plate for your installation cable management

Packaging for land freight as standard
Packaging for air freight available at extra cost

## BOLHOLT W:BIINDW

## Control Techniques has been designing and manufacturing the best variable speed drives in the world since 1973 -

Our customers reward our commitment to building drives that outperform the market. They trust us to deliver on time every time with our trademark outstanding service.

More than 45 years later, we're still in pursuit of the best motor control, reliability and energy efficiency you can build into a drive. That's what we promise to deliver, today and always.

## \#1 FOR ADVANCED MOTOR AND DRIVE TEEHNOLOGY

## Nidec Corporation is a global manufacturer of electric motors and drives.

Nidec was set up in 1973. The company made small precision AC motors and had four employees. Today, it's a global corporation that develops, builds and installs cutting-edge drives, motors and control systems in over 70 countries with a workforce of more than 110,000.

You'll find its innovations in thousands of industrial plants, loT products, home appliances, cars, robotics, mobile phones, haptic devices, medical apparatus and IT equipment all over the world.
